**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-4, drawn to a slide device for vehicle seat, classified in class 248, subclass 424.
  - II. Claims 5-7, drawn to a method of assembling a slide device, classified in class 29, subclass 428.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another and material different process such as moving the one end of the coil spring to the first spring protrusion whereby the lock piece of the lock mechanism is biased in a lock direction after assembling the slide device, or the process as claimed can be practiced by another and materially different apparatus such as the apparatus having the lock pawls rotatively biased by the coil spring or the second spring protrusion catching the one end of the coil spring provisionally or by hand.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Mr. Richard L. Schwaab on July 22, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
